Mt Pleasant, SC

Bill Jenkins Education

1967 Morehouse College. BA Mathematics

1974 Georgetown University. Masters in Biostatistics

1977 University of North Carolina at Chapel Hill. Masters in Public Health

1983 University of North Carolina at Chapel Hill. PhD in Epidemiology

1987 Harvard University post doc in Biostatistics

2011 Medical University of South Carolina Honorary Doctorate

What drove his career?

Love of epidemiology

discovered epidemiology as a graduate student in biostatistics

Dedication to social justice

A teenager involved in voter registration in Charleston

At Morehouse a foot soldier with the Student Nonviolent Coordinating Committee

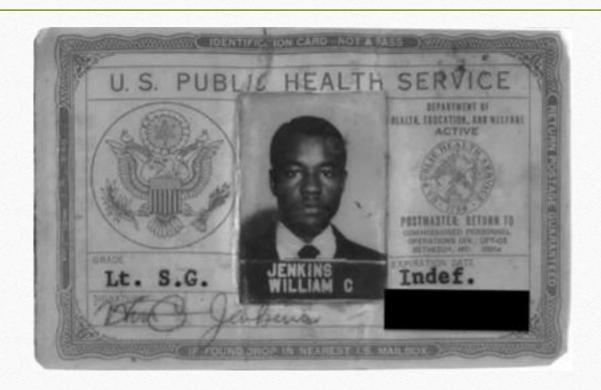

Career Themes

Tuskegee syphilis study

Expanding the public health workforce in epi and biostat (later to include more disciplines)

with a special type of mentoring

Discovery of the Tuskegee Study of Untreated Syphilis in the Negro Male

UNTREATED SYPHILIS IN THE MALE NEGRO BACKGROUND AND CURRENT STATUS OF PATIENTS IN THE TUSKEGEE STUDY

STANLEY H. SCHUMAN, M.D.,* SIDNEY OLANSKY, M.D.,**

EUNICE RIVERS, R.N.,*** C. A. SMITH, M.D.,****

AND DOROTHY S. RAMBO, R.N.*****

From the Venereal Disease Program, Division of Special Health Services, U. S. Public Health Service,

Washington, D. C.

•"What they deserve is the best medical care we can provide," Dr. Jenkins told The Times in 1997. "I try to give them the care that I would want to give to my mother."

Presidential Apology

THE PRESIDENT

welcomes you to

THE WHITE HOUSE

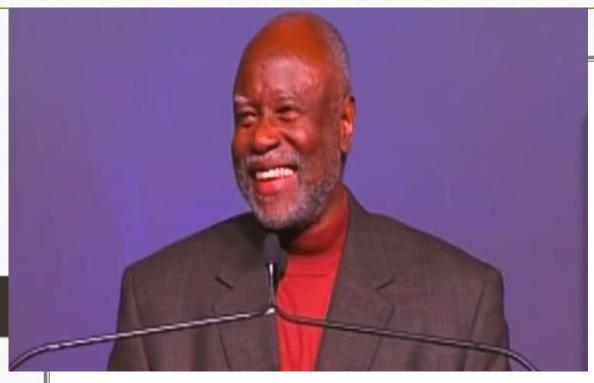

President Clinton

"The United States government did something that was wrong – deeply, profoundly, morally wrong. It was an outrage to our commitment to integrity and equality for all our citizens.

"No power on Earth can give you back the lives lost, the pain suffered, the years of internal torment and anguish. What was done cannot be undone. But we can end the silence. We can stop turning our heads away. We can look at you in the eye and finally say on behalf of the American people, what the United States government did was shameful, and I am sorry."

SOCIETY FOR ANALYSIS OF AFRICAN-AMERICAN PUBLIC HEALTH ISSUES SAA P.O. BOX 95031 • ATLANTA, GEORGIA 30347-0031

Editorial: On the Occasion of a Meeting Long Planned

....Bill Jenkins, Ph.D., M.P.H.

In the summer of 1970 four young Black men met in Toronto at the American Statistical Association Meetings following a session on Black health issues to lament the fact that there was only one Black presenter. It was observed that at that time there were less than five Black Americans with doctorate degrees in Epidemiology or Biostatistics. After much debate, anger and anguish there was a commitment made to develop those of us who were already committed to the fields, to bring new people in, and to look at these health issues from a black perspective. After only twenty years of frustrations, disappointments, rejections, and some success we are about to embark on the final phase of this commitment.

All of the formerly young, but still black men completed their doctorates in eleven years. But, in that time more than forty blacks trained in the fields at the masters level. Some succeeded, others did not: waylaid by barriers, traps, weaknesses, and fate. But through the efforts of those relatively few who survived, the number of younger people coming into the field exploded so that today there are more than two hundred Black Americans with some training and/or experience in the fields of Biostatistics or Epidemiology. Together with other Black Americans from the medical and social sciences applying their skills to the public health issues, there is now a critical mass of African—American Public Health scholars to look at the public health problems of African—American communities from a Black perspective.

This is the calling of SAAPHI.

Through SAAPHI we will continue the training efforts made at the National Center for Health Statistics, the University of North Carolina and the Centers for Disease Control. We have learned that a few people with commitment can make a real difference.

While continuing the efforts in human resource development, we also look forward to expanding activities in research and policy development. There remain many questions to study, including: 0 To what extent is the difference in health status a function of race and culture.

0 To what extent is racism a continuing factor in determining health status?

On November tenth at Spelman College we will have an opportunity to set a research agenda for the next few years. On November the eleventh we will initiate the structure to achieve these goals.

We look forward to the largest gathering of African American public health scientists in American history and look with even greater anticipation to the future work.

See you in Atlanta.

These programs focus on mentoring more than role models

They focus on experience more than exposure

They focus on long term goals more than short term objectives

They focus on the things which make a difference

Support for the things that can make a real difference is lacking

Chapter: AIDS/HIV Epidemics in the Black Community

Ronald L. Braithwaite, Sandra E. Taylor, editors; foreword by Louis W. Sullivan.

San Francisco: Jossey-Bass, c1992.

1st ed.

1986 First Black AIDS Conference

The National Coalition of Black Lesbians and Gays, with a grant from the U.S. Public Health Services, sponsors the National Conference on AIDS in the Black Community in Washington D.C. in July. The conference attracts more than 400 educators, health care providers and activists, connecting people from across the country to address the specific needs of African Americans with AIDS.
