

Seminar announcement

UNC Gillings School of Global Public Health

Department of Epidemiology

**Please join us for a Hybrid CancerEpi Millikan Seminar
February 14, 2025 from 1-2pm EST**

Lauren McCullough, PhD, MSPH

Presenting:

*Differential access and diminishing returns: What we've learned about
breast cancer inequities in Georgia*

Rosenau Hall, CEHS Conference Room 253

or

<https://zoom.us/j/95493760359>

Meeting ID: 954 9376 0359

(Passcode provided on request)

Lauren E. McCullough, PhD, MSPH is an Associate Professor in the Department of Epidemiology at the Rollins School of Public Health and Visiting Scientific Director at the American Cancer Society where she is co-Principal Investigator of VOICES of Black Women. Her overarching research interests are in cancer epidemiology, specifically the role of social and structural determinates of health to the breast tumor microenvironment, as well as disparities in cancer outcomes. Her research program integrates molecular epidemiology, epigenetics, and other biomarkers for disease risk and progression; environmental and social epidemiology; health services research; and causal inference methods. She is Principal Investigator of the BRIDGE research program at Emory which aims to improve cancer outcomes in underserved populations by bridging clinical and population research, molecular and social epidemiology, and scientist with the communities they serve. In doing so, she hopes to identify culturally relevant and sustainable targets for pharmacologic, behavioral, and policy intervention. Dr. McCullough received her PhD in Epidemiology from UNC in 2013.

The [CancerEpi Millikan Seminar](#) honors the late Robert C. Millikan, Barbara Sorenson Hulka Distinguished Professor of Cancer Epidemiology.
